

USAF 2012 DESIGN AWARD

Merit Award, Landscape Architecture

Stormwater System, Cape Canaveral Air Force Station, Florida

- **First-of-its-kind marriage of stormwater management and environmental cleanup**
- **Removed exotic invasive species, mitigated with nearly 7000 plants of 21 native species**
- **Will save \$4M in fill cost by stockpiling excavated soil**
- **Reuse of concrete rubble from other projects, saving \$85K disposal cost**
- **Saved \$60K in annual electric and \$30K in maintenance cost by eliminating two electrical treatment systems. Eliminated 244 tons of carbon load**
- **Added 13 acres of critical native habitat and credits for future mission-related needs**
